General Reject Information

Free File Fillable Forms relies heavily upon accurate taxpayer input into the form and schedule fields. When you make an input mistake, you violate a Business Rule and the IRS will reject your return. Your rejected return notice will contain one or more Business Rule violations, defined by letters and numbers (e.g. Business Rule F1040-034-01).

All Business Rules (except X0000-005), will provide a description of your error. Descriptions usually provide enough information for you to correct the mistake. Below, we have listed the [Most Frequent Business Rules Violations](#). This list generally includes additional information to assist you in making the correction(s).

Business Rule X0000-005 - The XML data has failed schema validation. This error is much more difficult to understand because there is no description of the error. Sometimes, looking into the text before the business rule appears will help you determine where the problem is. For example:

*Field/Xpath: /efile:Return[1]/efile:ReturnData[1]/efile:IRS8863[1]/efile:StudentAndEducationalInstnGrp[1]
/efile:LifetimeQualifiedExpensesAmt[1] Issue : Business Rule X0000-005 - The XML data has failed schema validation.*

In the example above, the text is leading you to Form 8863 and the Lifetime Qualified Expense Amount.

In many cases, the text shown before Business Rule X0000-005 does not contain enough information to assist you with finding and fixing the problem.

When you receive Business Rule X0000-005, you should:

1. Check the [XML Error Spreadsheet](#) to see if your error is there. The spreadsheet will provide specific places to look and make corrections on your return.
2. Review the [Business Rule X0000-005 Error Information](#) below.

If you think you entered the AGI correctly, you must call the IRS to resolve the mismatch: 800-829-1040.

You can enter the same AGI for you and your spouse if you are married filing jointly. However, if you and your spouse filed separately, you will need to enter different AGI amounts from each of your previous year's tax returns.

If you are unable to locate your prior year adjusted gross income (AGI) or prior year PIN you can get a new Electronic Filing PIN. To get your Electronic Filing PIN, access <http://www.irs.gov/Individuals/Electronic-Filing-PIN-Request> or call IRS Toll Free number at 1-866-704-7388 and follow the instructions on the automated system. EFP Help is an additional method for verifying the identity of taxpayers electronically filing their 2012 tax returns. Business Rule X0000-005 – The XML data has failed schema validation

Please read the information on the most common reasons for Business Rule X0000-005 Errors, below the Important Submission ID information, before contacting us about your rejected return. Reviewing the common errors and fixing them yourself will allow you to successfully e-file sooner.

IMPORTANT: Reformatting the Submission ID

Locate your most recent return rejection email, copy all the information in the rejection email and paste it into the email to us at IRS.gov.website.helpdesk@speedymail.com. Once you paste in the information, locate the 20-digit Submission ID within the email you are sending to us and put a period and a space after every fourth number. For example, if your Submission ID is 25897563284892157923, **in your email to us, your Submission ID should look like this: 2589. 7563. 2848. 9215. 7923**

If you fail to format your Submission ID with a period and space after every fourth number, assistance will be significantly delayed.

The most common reasons taxpayers receive Business Rule X0000-005 XML Schema Validation Errors:

1. You incorrectly used one or more of those **little grey boxes** (Tax Literal Fields). The forms contain small grey boxes that appear to the left of where you put your figures. These area appear throughout the form.

The image shows a portion of a tax form. It features a table with two columns. The first column contains the text '7 Wages, salaries, tips, etc. Attach Form(s) W-2'. The second column contains the number '7'. A red arrow points from the text '7 Wages, salaries, tips, etc. Attach Form(s) W-2' to the number '7' in the second column.

- a. You should not put any data into these areas unless the form instructions tell you to do so.
- b. Properly entering a Tax Literal usually requires input into a description field and a corresponding amount field. The description field is usually the first Tax Literal field and may accept alpha and numeric characters. The "Amount" Tax Literal fields only accept numeric characters.

- c. The program will only allow one Tax Literal (a description field and an amount field) per line.
 - d. If instructed to enter a Tax Literal, you must enter the Tax Literal exactly as it appears in the form instructions. Include any capital letters, but do not include any quotation marks. There are tables below that show the [acceptable Tax Literals](#); however, you should always consult the instructions for the form you are working on.
2. You have omitted information or crammed too much information into a required field. If you are using a mouse to navigate the forms, it is easy to do. It may be possible to fix the problem by looking in the Xpath for a form number and using the Tab Key to locate the fields that are the source of the problem. See the examples below:
- a. In this example, you would look to find the problem is with the first W-2 that was entered
Field/Xpath: /efile:Return[1]/efile:ReturnData[1]/efile:IRSW2[1]/efile:EmployeeUSAddress:
 - b. Here is an example of where the first and last names were crammed into one field
